NAKDONG DISPLAY CO., LTD.

Gumi Industrial Complex, Gyeongsangbuk-do, Republic of Korea

Ref: ND-LGL-2026-0418

Date: 15 October 2026

To: All customers - Automotive Display Business Unit

NOTICE OF FORCE MAJEURE

Nakdong Display Co., Ltd. hereby gives notice of a force majeure event under the supply agreements in place with your company.

On 14 October 2026 at approximately 02:40 local time, a fire broke out in the cleanroom of Gumi Plant 2, which produces our 15-inch automotive OLED display panels. No injuries were reported. The fire was contained the same morning, but the deposition and encapsulation lines sustained smoke and water damage.

Production of 15-inch OLED display panels at Gumi Plant 2 is suspended with immediate effect. Based on the initial damage assessment, we expect to resume shipments on or around 15 December 2026. Finished-goods inventory held at the plant has been quarantined pending quality inspection.

Our other operations in Gyeongsangbuk-do, and our export logistics through the Port of Busan, are not affected by this event.

We will allocate any qualified inventory proportionally across customers and will provide weekly recovery updates. Please direct questions to your account manager.

J. H. Park, General Counsel
